- 7 Annual equivalent rate is a notional rate which illustrates what the interest would be if interest was paid and compounded on an annual basis.
- 8 Other rates may be available on application.

Interest rates detailed herein are paid pursuant to our Terms of Business. We will account to you for interest earned on uninvested client money deposited with an Approved Bank only at the rates specified in this schedule, as amended from time to time at our discretion with reference to changes in the interest rates of Approved Banks. You should note that the rate of interest paid by Approved Banks will usually exceed the rate of interest which may be earned by you on uninvested client money, as specified in this schedule. Any excess in interest paid by Approved Banks over the interest to which you are entitled under the above schedule will be for the benefit and account of, and shall be retained by, us. You will not earn any interest on any uninvested money for any period that it is not deposited with an Approved Bank for any reason.

Illustration of foreign exchange transaction margin

For all transactions, except dividends and corporate actions, the margin is applied to each tier, so on a £150,000 transaction, the margin will be 0.50% on the first £100,000 and 0.40% on the next £50,000.

For dividends and corporate actions, the margin will be 0.50% on the entire value.
